Sublette County Hay Producer:

Sublette County Weed and Pest District would like to thank you for your participation in our hay certification program. Producing weed free forage requires a lot of time and diligence on your part and we are grateful for the hard work you put in to minimizing the spread of invasive plants in our County!

As most of you know, certified hay is identified by either tags, a transit certification that is given when hay is being transported, or the use of a special colored twine that is approved by the North American Invasive Species Management Association (NAISMA). In recent years, SWCP has slowly began to incorporate the use of certified twine into its weed free forage program and this summer, more producers requested to use that twine. Due to the increase in twine use and to encourage further use, the District has adopted the following policy for the use of certified weed free twine:

**The District will give one roll of twine per producer per year free of charge, if remaining rolls of twine are needed, they will be sold at cost to the producer.**

Remember, it is only required to use the certified twine on **one half** of each bale of hay. It has been our experience in talking with producers that one roll of certified twine will cover around 375 small bales depending on bale size.

The twine manufacturer requires us to special order the twine in cooperation with the other Weed and Pest Districts throughout Wyoming. Our order is due to the manufacturer on December 15<sup>th</sup>. We would ask that if you would like to try using the twine or will continue to use it to please contact the Sublette County Weed and Pest, so that we make our order as accurate as possible.

Again, thank you for all your hard work to grow weed free forage! If you have questions you can call us at 367-4728.

Andy Currah, Supervisor
